

# ONRAMP #1: PARTICIPATE

STEP #1

## Catch the Vision

It will help greatly if all the members of a given DNA Group are familiar and on board with the underlying vision and ultimate goal of these groups.

*Suggested Action(s): Read the Pursue Discipleship booklet*

STEP #2

## Find Your Folks

After getting a better sense of what these groups are all about, your next step is to prayerfully find your folks.

*Suggested Action(s): Use the church website; invite people personally; ask church leaders for help*

STEP #3

## Follow Jesus Together!

Now that you have a smaller group of committed people who are willing and wanting to meet on a consistent basis, you are ready to begin Discovering, Nurturing, and Applying Christ together until He is all in all!

# ONRAMP #2: FACILITATE

*Note: This second onramp includes the same three simple steps involved in the first with the addition of a "half step" in between.*

STEP #1.5

## Get Trained

If you are interested in facilitating your own DNA Group, let us know! We want to help as you pray, brainstorm, and craft the vision for it. This involves two initial training meetings.

*Suggested Action(s): Along with the Pursue Discipleship booklet, read through the DNA Groups Facilitator Manual*

STEP #2.5

## Get Started

After you have found your folks, it's time to get started!

*Suggested Action(s): In the DNA Groups Facilitator Manual, look over the Starter Checklist to confirm you have thought through much of the details; consider if/how you will make use of the two optional Starter Studies*

***Note: Whether you want to participate or facilitate, we would encourage you to initiate!***
